Dear Sir:

By and with this reply, I hereby elect the species of Fig. 4. The elected species of Fig. 4 employs a reflection grating, while the non-elected species of Fig. 4b employs a transmission grating. All of claims 1-13, 15-35, and 37-45 read on the elected species. Claims 1-12, 15-34, and 37-45 are generic insofar as they do not depend one way or the other on the Fig. 4 versus Fig. 4b choice of a reflection versus a transmission grating. Claims 13 and 35 specify a reflection grating and thus read only on the elected species. Claims 14 and 36 specify a transmission grating and thus read only on the non-elected species.

By and with this reply, I hereby request further examination and consideration of this application, on the basis of the claims and remarks already of record I this case.

Very Truly Yours,

Jay R. Yablon
